

Mantis

The Mantis looks so much like the plant where it lives that it is almost invisible. It has the unusual ability to not move for hours while waiting for its next meal.

When a meal comes along its strong front legs strike out with lightning speed and clamp on to its prey like a vice. The Mantis always kills the same way...a bite behind the head.

The Mantis will eat just about anything, including its mate. But it will not harm an ant.

God created exactly the right instinct, deception color, strength and speed together with a non-stop eating machine to demonstrate his awesome power and creativity.

God does not make mistakes.

“For since the creation of the world God’s invisible qualities—his eternal power and divine nature— have been clearly seen, being understood from what has been made, so that men are without excuse.”

(Romans 1:20)
