

The Octopus

The octopus is a strange looking critter with a funny looking head and eight legs that go in all directions.

When threatened the octopus produces an inky cloud for protection. It can change colors and has a special propulsion system that lets it get away from enemies really fast.

Wow! God must have had fun creating the octopus. God has given us all kinds of creatures so we can understand his greatness.

“For since the creation of the world God’s invisible qualities— his eternal power and divine nature— have been clearly seen, being understood from what has been made, so that men are without excuse.”

(Romans 1:20)
