

Critics said the Bible was not accurate because there was no evidence that camels were in Chaldea during the time of Abraham. Evidence was found! The Bible is historically accurate.

The Bible has Belshazzar as the king of Babylon that was killed by the Persians. But archaeological evidence shows that Nebonidus was king at that time. This evidence seemed to prove the Bible is not accurate. Later discoveries solved the problem. Belshazzar was the son of Nebonidus. Nebonidus lived in Arabia. Belshazzar had been entrusted with the kingdom.

Test My Knowledge

Old Testament characters puzzle

Across

Dinosaurs in Bible times?

There is a detailed description of a creature that is amazingly similar to any of several plant-eating dinosaur skeletons found in the fossil record.

(Job 40:15-24)

God has provided a lot of evidence to show us the Bible is reliable!
